## SUMMARY OF QUALIFICATIONS

Highly focused software engineer looking to make the switch into product management where I plan to apply my experienced problem-solving, analytic and strategic thinking to deliver end to end solutions. I hope to become a high energy motivated product manager with proactive leadership, strong organization skills, and the proven capability of delivering results with an exceptional ability for stakeholder management.

---

## RELATED EXPERIENCE

**Software Engineer**, *Microsoft*, Redmond, WA September 2017 – Present

- Design, implement, and test new features that are integrated into Dynamics 365 solutions
- Champion code quality by overseeing testing and ensuring best practices are followed
- Pitched, and implemented a new branching strategy for code delivery of engineers

**Software Developer**, *Liberty Mutual Insurance*, Seattle, WA July 2015 – September 2017

- Implemented new client features using JavaScript and Angular
- Designed, created and updated Java based RESTful services adding new functionality for a go-forward application
- Provided valuable input and estimates for project plans and depicted potential strategies and issues
- Worked in an agile environment delivering code to a CI/CD pipeline

**Software Developer**, *Informion*, Seattle, WA September 2014 – June 2015

- Wrote software requirements and design documentation for the implementation of RESTful web services
- Utilized advanced development tools, including a number of JavaScript frameworks
- Collaborated with marketing directors and developed strategies to further business growth
- Worked with a small team of developers to brainstorm and implement new features

**Business Technology Services Analyst Intern**, *PEMCO Insurance*, Seattle, WA June – September, 2014

- Revised and updated the Intern webpage
- Built a data warehouse to populate and manage customer data
- Represented the PEMCO organization at community events and sponsorship activities
- Collaborated with other interns on a summer-long project that was presented to the Board of Directors
- Analyzed data from various sources to understand trends and make recommendations on extract, transform, and load solutions

**Data Migration Consulting Project**, *CONNEX Solutions*, Redmond, WA March – May, 2014

- Collaborated with sales, engineering, and IT members to migrate data from a legacy system to Microsoft's newest Customer Relationship Management system
- Designed data models and flows for the migration of corporate Customer Relationship Management system
- Worked with executive management and IT to understand specifications, logical processes, and architecture
- Presented an executive overview during bi-weekly status meetings during the development phase
